Ripple is a revolutionary audio and video communications application. It is the answer to work places, government, schools and individuals that want to make real time

audio and video communications work in an easy to use package. Ripple is the ultimate solution for making voice phone calls, meeting video calls, live group video conferencing, answering email and accessing voice mail, documents, applications, and online training courses. Ripple can transform voice communications from the archaic into something that can be enjoyed and used on a daily basis. Ripple is the only video communications tool on the market

that includes a plug-n-play feature that allows for easier integration into a network such as a company, government or school. Ripple is the only communications program that is capable of allowing users to create their own personalized page and participate in conference calls with people in over 185 different countries and territories. ClearBridge Enterprise Voice is an all-in-one enterprise communications solution for businesses and enterprises that wish to

implement audio conferencing. The software allows for the use of codecs, for example, H.323, 3GPP, SIP, SCCP, MGCP, etc., PSTN routing, transcoding, audio compression, H.245/RTP, H.261, MPEG-4, G.723.1, G.723.1/L8, G.729A, G.729E and G.729EV. The system also allows for the management of multiple users and groups with the creation of meeting rooms and the distinction of multiple media streams (audio, video and text). On the management side of

the solution, it allows for the management of up to 8 systems, with the synchronization of the same AV stream from all systems. ClearBridge Enterprise Voice Description: · New user friendly interface · MS Outlook based user administration · External phasing · SIP capability · ISDN based PSTN capabilities · Video On Demand capability · Voice messages · Incoming call

System Requirements:
