Easy setup of server and clients LAN and remote access VPN tunnels are established securely, so the transmission of information will be protected in the best way possible. SoftEther VPN starts off as an academic project, rapidly making its way to what is now a trustworthy and reliable VPN solution fit for both home and organization use. Although it was designed as an alternative for OpenVPN as well as Microsoft's SSTP-based VPN protocol, SoftEther VPN provides support for both of these, allowing users to clone the server's settings in order to simplify the migration process. SoftEther VPN relies on a client-server architecture with support for six of the most popular VPN protocols, namely: EtherIP, IPsec, L2TP, OpenVPN, MS-STRIP and L2TPv3. VPN tunnels are established securely, so the transmission of information will be protected in the best way possible. LAN and remote access The VPN servers can be setup behind your company's firewall, allowing employees to reach to it from the comfort of their homes or using mobile devices such as smartphones and tablets. No matter the distance, access to your VPN network will be facilitated seamlessly, via ad-hoc and LAN to LAN technologies that allow you to build your own IT infrastructure. If your company's assets are distributed all over the country, you can use SoftEther VPN to control them remotely, allowing IT professionals to build an enterprise-level network. Other highlights include firewall transparency, AES and RSA encryption, high-speed performance, as well as dynamic-DNS and Nat-transversal support. What are you waiting for? Download it now for free and give yourself the best VPN protection your money can buy! Based on a simple yet highly effective algorithm designed to provide a safe, fast and reliable protection for any network connection, SoftEther VPN is one of the most powerful tools you can use to secure your Internet connection. As an OpenVPN & Microsoft SSTP server, SoftEther VPN will provide a VPN tunnel secured via a reliable connection to a Cloud server, allowing you to travel to any site you like without any concerns.
