Boilsoft video splitter 7.02.2, crack with keygen.Reproductive system complications in surgical and medical abortions. Reproductive system complications during surgical and medical abortions were compared. The complete medical abortion group had fewer complications than the surgical group (2% versus 19%). The serious complications consisted mainly of hemorrhage. However, the incidence of major complications (fibroma, ectopic pregnancy, and postabortion infection) was similar for the two groups. The indications for abortion were similar for the two groups, except for a lower incidence of abnormal menstruation in the medical group
