“We needed to develop a technology that was twice as fast as the already next generation of speed and accuracy found in previous FIFA games. To do that, we used our collective experience with real-life speed and accuracy testing to produce a new revolutionary technology that is able to simulate exactly how players move.”

“FIFA 22 introduces a range of new modes as part of our commitment to give players a deeper level of game control. With the new Player Editor and FIFA Ultimate Team FUT Mode we want to help players perfect their skills on the pitch and take on new challenges with the ultimate player-driven experience.” The result is FIFA 22, the fastest, most realistic football game to date, featuring “HyperMotion Technology.” More improvements include: Be A Pro Experience - New Match Day Mode and Ultimate Team Experience. The FIFA 22 New Match Day is an enhanced version of the FIFA Ultimate Team Challenge Mode allowing you to join your friends for a soccer challenge. Each week your club will bring one of the top eight clubs to play a friendly match against your favorite club. Choose your favorite football club and compete against other friends in friendly match challenges across the world. FIFA Ultimate Team Experience - FUT is now live on Xbox One. With over 5 million players worldwide, FIFA is the original and most popular fantasy football game on mobile and console. FUT is on its way to Xbox One and it will include a connection with the EA SPORTS Football Club. With FUT, you can create, manage and play FIFA Ultimate Team, and then earn rewards in a new way. The game rewards players for their playing style by allowing them to build or rebuild their Ultimate Team with both new and existing players from the user’s connected EA SPORTS Football Club, and then earn rewards for being a better player. Features and content from the FIFA game world, including new kits, clubs, and a new FIFA Ultimate Team Manager. Real Player Impact - Look, Feel, and Move like a Pro As players, we can all appreciate the ways that games can make us feel more like a pro. With FIFA 22, we wanted to give players a true sense of control over their game - a first-person view of your player character in motion is one of the most authentic gaming experiences out there.
