Q: help me decide if this quadratic has real roots My teacher told me to give it a go, but I can't really work it out. Can someone please help. $Q(x) = x^2 - x + 1$
A: Let us say $x = a+b$ where a and b are real numbers. Note that $x^2 - x + 1 = (a+b)^2 - (a+b) + 1$. Now we solve for $x^2 - x + 1$. You should

Boom3/Game9E/Orc/Crack Posted - 26 Oct 2018 : 09:35:18 4.5 out of 5 stars I just started playing this game today and I am very very impressed. When you first boot up the game (on PC) it takes a good 6minutes of games (there are tons of people connected in the chat) before the UI is ready. At this point I recommend leaving the game for a bit and coming back later as this can take awhile if you have a slow PC. I have now got 12 hours in the game and it is extremely fun and well worth the \$35 price tag. The UI is very easy to use and I never even have a problem changing to a different spell, character class or picking up items (for the most part). The combat is amazing and very satisfying. The graphics have great detail and are very sharp. The game plays exactly as it's shown in the screenshots. You have your character that you move with the keyboard and mouse, a tactical view to help you get a better look around the battle, and a battle view. One thing I love so far is that once you have selected your class, you can just click on an enemy and that will automatically equip you. There's no sit around and wait for a menu to come up or anything like that. Currently it's not really too difficult, at least not until you get to the later stages of the game. There are some very challenging boss battles towards the end where you have to weave in between a lot of fast moving enemies. Overall it's a very well balanced and entertaining game, and I expect to play it a lot for the next few weeks. The only issue I can see is that (if you don't have a Windows 7 or 8 machine) there is a bug where once you start a game or go back to the main menu you will get a popup that says "Windows has encountered a problem and needs to close. It's not in safe mode or "Startup Repair". Would you like to fix it?" If you reply "yes" then the game will close and you'll have to start the game all over again. For now it's a 4.5 out of 5 star game as I'm not 100% sure if this is going to be a game that I finish (it might be a
