EL CODIGO MOISES EN ESPA Dante Pakao Pdf.Q: how to pass a for loop index in a closure in swift so I have a UITableView and want to pass the index in the for loop a closure. I want to add a menu item to the table view with a button and the rest of the information from the item is in the rest of the array. for (index, menuItem) in menuItems where menuItem.title.isEmpty { let button = UIBarButtonItem(title: "\\(index)", style:.plain, target: self, action: #selector(pressedButton(\_))) self.navigationItem.rightBarButtonItem = [button] self.navigationItem.rightBarButtonItem?.tintColor = .black tableView.reloadData() } how do i pass this index in the closure to be used in the tableView? A: I do not know why you would want to use a closure here, but... You need a variable to hold the index, and it can be passed as a parameter to a function. If you use a "for-in" loop, you can create the variable with a "let" statement in the loop. If you use a "for-in" loop with a "for-in" loop, the variable must be created outside of the inner loop. An example: var index = Int() // for-in loop for index in menuItems where menuItem.title.isEmpty { } As index is passed as a parameter to the function, you can use it in the function. Q: MySQL - find the most recent row for each user How can I get the most recent row from my mysql table for each user? Basically I want to get the last login date for each user (called user\_id), but I don't want to select the entire row, but only the date field (called date). If I do this: SELECT \* from information
