The Patriot Burst (240 GB) is encased in a sealed transparent plastic casing to protect it from accidental knocks, drops, and damage. It features an easy to view system status LED indicator on the top of the hard drive to display system activity and alert users when the drive is running low on power or internal temperature. While the Patriot Burst 240 GB SSD delivers exceptionally fast sequential read / write speeds, the Patriot Burst (240 GB) is ideal for content creation enthusiasts and video and photo editors that depend on the high performance and data transfer speed for optimal performance and delivery of content. This SSD offers a superfast random write speed of 75,000 IOPS and an impressive random read speed of 70,000 IOPS. The Patriot Burst is designed with superior reliability. The drive comes with a 3 year warranty which is the industry leading warranty for desktop SSDs. Let's take a look at the history of the Patriot Memory Memory, Patriot Endurance - A Commitment To The Environment. Starting with the end of 2010, Patriot Memory was presented as a major contributor to the Green Movement and is making progress in reducing product impact on the environment. For example, their new range of MSATA SSDs for desktop and notebook PCs use a new range of energy-efficient, Low-Voltage Intel CPU chipsets that cut power consumption by up to 90%. Patriot burst review and ReadSpec data is gleaned from Patriot Memory SD1215WS 120GB Patriot SSD benchmarks. Patriot Memory SD1215WS 120GB Patriot SSDs were set to factory defaults. For comparison, we have selected other SSDs to benchmark, including the Seagate ST500DM004 and the Western Digital WD Blue 2TB, both of which are similar in size and capacity to the Patriot Burst 120GB SSD. We would not recommend that the Western Digital WD Blue 2TB be used in applications where very large sequential writes are performed, as we tested it in a case of over-provisioning. This SSD presents consistent performance and power consumption values based on our tests, which were performed at 1533 RPM.

Patriot is well known for their innovative solid state drives that are optimized for both gaming and content creation. Users could take some time to enjoy some of the features in Patriot flash like Unlimited Lifetime Warranty, fast sequential read/write speeds, fast random write speed, and Burst Cache that assures the potential user that the Patriot SSD will deliver a great performance. The Patriot SSD is priced at \$129.99 and is actually a good drive for the price. The Patriot Burst 240GB SSD delivers speeds of up to 540 MB/s reads and 520 MB/s writes and provides all the features required to ensure that the user gets the best reliability and performance from the SSD. The Patriot Burst 240GB SSD brings improved reliability and stability, and helps to optimize the disk's temperature and makes the disk more resistant to damage due to drops, operation shock, and other physical stresses. The Patriot Burst uses a unique, proprietary technology, Multi NAND Flash (NAND) chipset which is the first level of next-generation SSD. The Multi NAND Flash (NAND) that Patriot Memory is using, is called chip-level flash technology, which ensures that the flash memory is divided into even smaller pieces. The technology enhances the endurance of the SSD, thus, has a longer lifespan. The Patriot Burst is also the first SSD in the market that uses a proprietary MLC NAND memory that is twice as dense as the industry standard MLC (Multi Level Cell) NAND. The MLC NAND technology that Patriot Memory is using, is called chip-level flash technology, which ensures that the flash memory is divided into even smaller pieces. The technology enhances the endurance of the SSD, thus, has a longer lifespan. Sec8ef588b
