SoftHotspot is a simple, free, cross-platform tool for visitors who work from remote areas or who are traveling.

SoftHotspot allows you to browse and download files that you could not normally access from your remote computer due to firewalls or

---

privacy restrictions. FTP Server SoftHotspot supports FTP, HTTP, and SFTP protocols. It supports file extension filtering, which allows the user to only download files matching a specific file extension. It can also extract the contents of ZIP and TAR files, as well as other ZIP archive file formats.

---

SoftHotspot is developed using C#, C++, JavaScript, and other .NET languages. SoftHotspot can support multiple languages. If you need to download files in foreign languages, you can easily translate the names of the downloaded files as you are downloading the files. The software is set

---

up to work with the most used torrent clients, like uTorrent, Ktorrent, Deluge, Qtorrent, BitTornado, and Transmission, among others. Downloader In addition to encrypting your files before downloading, you can save space on your hard drive with the disk space saver feature. It allows

---

you to automatically compress and delete files after a specified number of days. If you want to keep a backup of your files, you can use the backup feature to create a backup image or back up the files to an external hard drive or CD/DVD SoftHotspot offers a customizable user interface for

---

personalization. You can customize the download title, download path, file path, as well as file mask and file extension filters. You can also change the appearance with customize the various buttons, like delete, pause, restart, and cancel. 5ec8ef588b
